XOOM Energy Adds New Hampshire to National Footprint

Charlotte, NC, September 30, 2013: XOOM Energy moves forward with national expansion plans, adding New Hampshire to the growing list of states where XOOM products and services are available.

XOOM Energy is now offering electricity service to residential and commercial consumers served by the Public Services of New Hampshire. Customers have the option of fixed or variable rate plans, allowing them to manage their energy spend with the competitive pricing that fits their individual needs.

The expansion into New Hampshire represents yet another milestone for XOOM Energy. From the first day of operation, XOOM identified itself as a national retailer and has worked diligently over the past two years to earn the business of home and business owners in every deregulated market in the United States. Entry into New Hampshire brings the company one step closer to that goal. "New markets mean new opportunities for XOOM" says Bob Blake, COO. "We continue to learn as we grow and having the chance to apply best practices across all our territories is going to mean better products and services for customers in every state we service."

Although the northeast represents a large sector of the deregulated population, opportunities for growth and development are still available in other regions. As the third quarter draws to a close, XOOM continues to assess and prioritize goals that will help the company close strong in 2013 and set the stage for 2014.

About XOOM Energy, LLC

XOOM Energy is an independent energy retailer, supplying natural gas and electricity to residential and commercial customers in deregulated energy markets across the United States. As one of the largest energy retailers in the country, XOOM is able to provide competitive pricing on traditional and renewable energy options.
